This bill allows pharmacists to prescribe and administer the following to patients 6 years and older pursuant to board of pharmacy rules and protocols: TB skin tests (including interpretation and referrals for positive results); medications to treat positive results for flu or strep throat tests; non-sedating and low sedating antihistamines, corticosteroids, decongestants, saline, cromolyn sodium, and leukotriene receptor antagonists; and routine chronic non-controlled medications (additional 30 to 60 days). This bill requires pharmacists to be board certified and meet all board requirements before prescribing and administering pursuant to this section.

This bill changes the definition of the practice of pharmacy to allow a pharmacist to dispense a 12-month supply of hormonal contraceptives to a patient pursuant to a standing order. It also requires pharmacists to complete an ACPE-accredited training program prior to dispensing under the standing order. This bill requires certain health insurance plans to provide coverage for patient care services provided by a pharmacist for hormonal contraceptives assessment and consultation. It requires the state Medicaid program (both FFS and managed care) to cover these services at a rate of reimbursement of 85% of the physician fee schedule.

This bill allows a pharmacist to initiate a refill for the quantity on the most recent fill or a 30-day supply, whichever is less, for noncontrolled substances. It also allows the pharmacist to change the prescribed quantity or package size if it is not commercially available, relates to a change in dosage form, reflects the intended days supply, or if in the best interest of patient care. This bill allows a pharmacist to complete missing prescription information if there is sufficient evidence to support the change and to extend a maintenance drug for the limited quantity necessary to synchronize a patient's refills. This bill also allows pharmacists to prescribe inhalation spacers, nebulizers, supplies for medical devices (including CPAP machines and insulin pumps), normal saline and sterile water for irrigation, diabetes testing supplies, pen needles, and syringes.

Addresses limited distribution status, unnecessary required accreditation, and network accessibility. Prohibits a carrier from preventing the dispensing of specialty drugs included in the patient's pharmaceutical drug benefits by any pharmacy licensed by the state BOP. The board shall establish a procedure to license specialty pharmacies – as it should be since the board regulates the practice of pharmacy. A specialty pharmacy shall not be defined as a mail service pharmacy. List of drugs dispensed shall be sent to the board annually – allows for transparency on what the PBMs deem specialty vs what they allow community pharmacies to dispense

This bill allows partial fills of CII drugs if the patient requests partial fills and the total quantity dispensed does not exceed the original quantity prescribed. This bill also allows pharmacists to dispense opioid overdose reversal agents pursuant to a standing order. It also allows the department to enter into agreements with other jurisdictions to exchange PDMP data as long as the exchange meets federal health care information privacy requirements. The Senate companion bill is SB 5380.
