**Along with Valentine's Day, February marks
American Heart Month, a great time to commit
to a healthy lifestyle and make small changes
that can lead to a lifetime of heart health.**

Heart disease is the leading cause of death for men and women.

Small Changes Can Make a BIG Difference

You can make a big difference in your heart health by taking these small steps during the month of February and beyond.

- ✓ Schedule a visit with your doctor to talk about heart health. It's important to schedule regular check-ups even if you think you are not sick. Partner with your doctor and health care team to set goals for improving your heart health, and don't be afraid to ask questions and trust their advice.
- ✓ Add exercise to your daily routine. Start off the month by walking 15 minutes, 3 times each week. By mid-month, increase your time to 30 minutes, 3 times each week.
- ✓ Increase healthy eating. Cook heart-healthy meals at home at least 3 times each week and make your favorite recipe lower sodium. For example, swap out salt for fresh or dried herbs and spices.
- ✓ Take steps to quit smoking. If you currently smoke, quitting can cut your risk for heart disease and stroke.
- ✓ Take medication as prescribed. Talk with your doctor about the importance of high blood pressure and cholesterol medications. If you're having trouble taking your medicines on time or if you're having side effects, ask your pharmacist for help.
