**FIREWORKS SAFETY...
HAVE FUN & PROTECT
YOUR FAMILY THIS
HOLIDAY!**

Who can picture July 4 in America without fireworks? They're part of the celebration, of course. But fireworks can be dangerous, causing serious burns and eye injuries. It's always best to attend a community celebration where fireworks are handled by the pros. But if fireworks are legal where you live and you decide to set them off on your own, be sure to follow these important safety tips:

- Never allow children to play with or ignite fireworks.
- Read and follow all warnings and instructions.
- Be sure other people are out of range before lighting fireworks.
- Only light fireworks on a smooth, flat surface away from buildings, dry leaves and flammable materials.
- Never try to re-light fireworks that have not fully functioned.
- Keep a bucket of water handy in case of a malfunction or fire.

As a health professional, your community pharmacist can offer you trusted service, care and advice.

BENEFITS OF 'YOUR' LOCAL PHARMACY

Your community pharmacist is your medicines expert, providing professional advice and counselling on medicines including their use and effects, as well as general health-care guidance. Having a relationship where they know about you and the medicines you take can help maximise the benefits of your health regimen.

In addition, such a relationship can be beneficial in the event of any adverse reactions you may have to a medicine you are taking as your pharmacist will be aware of your health history, allergies and so on and be able to act accordingly.

Your pharmacist is also increasingly becoming involved in the delivery of professional services which are services performed by the pharmacist or pharmacy staff to support your health. These can include weight management, smoking cessation, diabetes management, sleep services, blood pressure monitoring and medicines checks just to name a few.

They have a professional interest in your welfare and the relationship of having a regular pharmacist means that professionalism is underscored by a better knowledge of you, your lifestyle and your health history.
